

Fleet Management

From acquisition to disposal and everything in-between.

Our tailored Fleet Management service offers you a comprehensive and flexible solution, helping you to manage your fleet.

Whatever the size of your fleet, we will make your life easier by managing everything – both vehicle and driver-related, allowing you to concentrate on your core business activities.

Main features include:

- P11d reporting
- Asset management
- Vehicle acquisition and disposal

Main benefits include:

- Enhanced maintenance control
- Improved purchasing power
- Management information and fleet analysis
- Professional advice on fleet related issues
- Removal of non-core administration

Motor Insurance Database Reporting (MID)

Under the EU 4th Directive it is a legal requirement to have all details of your vehicles – which includes leased, rental, demonstrator and customer vehicles, reported on the MID. As this can be time consuming, ING can manage the administration of the MID on your behalf.

Main Features

- Fully compliant with legislative requirements
- Complete accuracy
- Full management reports

Fuel Management

By providing fuel cards for company vehicles, you will benefit from more control and visibility over your fuel expenditure through the provision of management reports. The fuel cards are widely accepted across the UK in multiple sites and franchises and all fuel types and vehicles are catered for.

Main features

- Widely accepted throughout the UK
- All vehicles and fuel types accepted
- Full management reports
